CLUB OPERATING GUIDE

The Festival Operations Console — A Walkthrough for the Club

This guide is written for Club staff — no technical knowledge needed.

WEBSITE	https://www.abeokutapolofestival2026.org.ng
CONSOLE	https://www.abeokutapolofestival2026.org.ng/abawole
TURNSTILE SCANNER (MOBILE)	https://www.abeokutapolofestival2026.org.ng/scan

1. Signing in

Go to **https://www.abeokutapolofestival2026.org.ng/abawole** — you are redirected to **Sign In**.

The normal way in — your password

1. Type your club email address.
2. Press **Use my password instead**.
3. Enter your password and press **Sign in**.

You land on the **Executive Command Centre** (or the Turnstile Scanner, for marshals).

If you would rather not type a password

1. Type your club email address and press **Email me a sign-in code**.
2. A 6-digit code arrives. Type it on the same page and press **Enter code**.

Club email addresses are **login identities, not mailboxes**, so every code for a club address is sent to the club's **one shared mailbox** (`abeokutapolo@gmail.com`). Ask the Secretariat if a code does not arrive for you. A code works once and expires after about 15 minutes; press **Send a new code** for another.

If the club switches on text-message codes, a **Text me a code instead** button will appear on the Sign In page. It stays hidden while the feature is switched off, so nobody will press a button that cannot work.

If you forget your password

Press **Forgot password?** on the Sign In page. You are emailed a one-time reset code (again to the shared mailbox for club addresses); type the code, choose a new password, and you are back in. A Super Admin can also reset your password for you from **Admin Hierarchy**.

> **Important:** change your own password before the event (see §11) and never share one login between two people — every action is recorded against the individual who signed in. If you are asked for a code by anyone, do not send it to them.

Who has which login

Login	Who it is for	What they can do
`superadmin@abeokutapolo2026.ng`	System owner	Everything, including creating and removing other admins
`admin@abeokutapolo2026.ng`	Second super admin	Everything, including creating and removing other admins
`president@abeokutapolo2026.ng`	Club President	Everything operational: participants, finance, gates, reports, invitations
`secretary@abeokutapolo2026.ng`	General Secretary	Everything operational: participants, finance, gates, reports, invitations
`finsec@abeokutapolo2026.ng`	Financial Secretary / Accounts	Participants, finance ledger, gate checks, reports, invitations
`gate@` , `gate1@` , `gate2@`	Gate Marshals	**Turnstile Scanner only** — they cannot open the console or the finance ledger

The Secretariat holds each person's password and hands it over **in person**. The console never displays a password, and no password appears in the website's source code.

---

2. The console map

Across the top of every console screen there is a bar of buttons:

Command Centre · Participants · Offline Finance · Verification Queue · Reports & Export · Admin Hierarchy · Change Password · Turnstile Scanner · Venue QR Poster

Section	What it is for	Who can open it
Command Centre (`/abawole`)	Live dashboard: how many people are registered, how many passes issued, how many gate scans, capacity	President, Secretary, Accounts, Super Admins

Section	What it is for	Who can open it
Participants (`/abawole/registrations`)	Everyone who has registered. Add someone by hand, edit, approve, decline	President, Secretary, Accounts, Super Admins
Verification Queue (`/abawole/members`)	People waiting for a decision: new registrations and unpaid bank transfers	President, Secretary, Accounts, Super Admins
Offline Finance (`/abawole/finance`)	The money ledger: commitments, sponsorships, table reservations and bank wires, and the one-click "verify" button	President, Secretary, Accounts, Super Admins
Reports & Export (`/abawole/reports`)	Four CSV downloads for audit and for the Club's records	President, Secretary, Accounts, Super Admins
Admin Hierarchy (`/abawole/admins`)	Create new admin logins, set their role, deactivate them	Super Admins only
Complimentary Invitations (`/abawole/invitations`)	Issue sealed VIP/complimentary passes to dignitaries and guests	President, Secretary, Accounts, Super Admins
Turnstile Scanner (`/scan`)	The gate scanner on a phone — scan a guest's QR pass and admit or reject	Gate Marshals (and everyone above)
Venue QR Poster (`/register/poster`)	Printable poster with the venue check-in QR code	Everyone signed in

If a button is missing from your bar, your role does not include that section — ask a Super Admin if you need it.

---

3. Command Centre (`/abawole`)

Your morning dashboard. It shows:

- **Ground Capacity** — how many guests are expected.
- **Participants** — number of registered attendees, and a **View All Participants** shortcut.
- **Issued ID Pass(es)** — how many digital passes have actually been issued.
- **Ingress Scans Logged** — how many people have been through the gate so far.
- **Manage Participants**, **Offline Finance**, **Gate Scanner PWA** and **Venue QR Poster** shortcuts.

Anything that says *"No gate scans recorded yet"* simply means no one has been scanned in yet — it is not an error.

---

4. Participants (`/abawole/registrations`)

The master list of everyone who has registered. A table with these columns: **Attendee · Issued ID Pass(es) · Turnstile Attendance · Status · Actions**, plus filters for **Confirmed / Pending Review / Declined** and the attendance type (**Individual / Guest of Member / Corporate**).

What you can do:

- **Add Participant** — register someone who is standing in front of you (walk-in). You enter their name, phone, email and which day they attend; the system issues their digital pass immediately.
- **Edit** — correct a name, phone number or email.
- **Delete** — remove a registration made in error (it also removes the issued pass).
- **Issue passes** — see who still says *"Not yet issued"*.
- **Turnstile Attendance** — shows whether the guest has been scanned in.

Statuses: **Confirmed** (good to go), **Pending Review** (needs a decision — see §5), **Declined** (not attending).

---

5. Verification Queue (`/abawole/members`)

This is the **most important screen on Day 3**. It lists two groups:

(a) Passes awaiting verification — passes created but not yet confirmed as genuine. These show as *Unverified* or *Provisional*.

(b) Registrations waiting for a decision — registrations in *Pending Approval*, *Pending Bank Verification* or *Pending Verification*. These are:

- guests who registered but need approval, and
- **guests who have said they will pay by bank transfer but have not yet paid.**

The one rule for Day 3

> **A bank transfer is NOT a payment until the money is in the Club's account and the Accounts has verified it.**
> Until then the guest holds a **Provisional Claim Slip**, the slip is clearly marked *"Turnstile Admission Pending Verification"*, and **the turnstile must refuse entry**.

So: **do not approve a bank transfer because the guest shows you a screenshot.** Approve only when the Accounts has confirmed the money has landed (see §6).

---

6. Offline Finance (`/abawole/finance`)

The money record. It has two halves:

- **Recorded proposed commitments** — pledges and sponsorships that have been promised but not yet paid.
- **Table reservations** — every VIP Table booking, with the buyer, the selling affiliate partner, **Amount Paid**, **Official Value** and **Payment Status**.

Two columns matter:

- **Amount Paid** — what has actually been received.
- **Official Value** — the brochure price of the package.

An unverified transfer shows **Amount Paid = 0** with status *Pending Bank Verification*. That is correct and deliberate: the Club has not been paid yet.

Verifying a transfer (the one-click button)

When a guest pays by bank transfer, the Accounts gets a WhatsApp message from the system containing a verification link. That link opens this page and puts the guest's reference in the search box — all you do is press **Verify Table Transfer**. The pass then flips from *Pending* to *Confirmed* and the guest can pass the gate.

If the link did not arrive, use the **Audit Reference** column to find the same record and verify it manually.

---

7. Reports & Export (`/abawole/reports`)

Four CSV files you can download at any time. Each saves with a dated, meaningful filename:

Report	What is in it
Gate Turnstile Ingress Manifest	Every check-in across the gates with timestamps and verification status
Master Accreditation & Pass Roster	Every registered attendee by tier, with pass IDs and zone access
3-Day Daily Turnstile Attendance Log	Per-day attendance, duplicate attempts and throughput
Offline Sponsorship & Endowments Ledger	Verified pledges, endowments and direct bank wires

Download them into a folder named for the event day, e.g. `Day3 — 20 Dec 2026`.

---

8. Admin Hierarchy (`/abawole/admins`) — Super Admins only

- **Create New Admin** — add a staff login with a full name, phone number and a **Role Classification** (President, General Secretary, Gate Marshal, Financial Secretary, Accreditation Officer, and others).
- **Edit Administrator Details** — change a name, phone or role.
- **Actions** — deactivate an admin who has left (do not delete: the audit trail must stay intact).

- **Change My Password** — the shortcut in the same screen.
- **Assigned Staff Logins** (top of the page) lists each person's login URL and email. **Passwords are never displayed anywhere in the console** — if someone needs a new one, use the "Reset password" action on their row.

> Roles decide what each person can open. Give the money people the *Financial Secretary* role, marshals the *Gate Marshal* role, and keep **Admin Hierarchy** itself to Super Admins only.

Two-factor authentication (2FA) — not used by the club

The club has decided **not** to use an authenticator app, so nothing asks you to set one up, nothing prompts you at sign-in, and no account is blocked. You sign in with your password (or a code).

If the club ever changes its mind, each person can enrol a second factor at **https://www.abeokutapolofestival2026.org.ng/mfa-setup**, choosing **phone app**, **this laptop**, or **fingerprint / USB key**, and a Super Admin then switches on the `mfa_required_for_console` setting to require it for everyone.

---

9. Complimentary Invitations (`/abawole/invitations`)

For dignitaries and invited guests who should not pay.

1. Press **Issue Complimentary Invitation**.
2. Enter the guest's name, designation and category (Royal / VIP Dignitaries, Custom Category, etc.).
3. The system seals the invitation, generates the guest's pass code and shows **Royal Seal Verified**.
4. Send it with **Copy WhatsApp Invitation** or **Copy Direct Guest Link**.

The table below shows every invitation: **Pass Reference · Dignitary Name · Designation · Category · Device Lock · Issued Date · Quick Actions**.

- **Device Lock** shows *Bound to Phone* once the guest opens their pass on their phone — that is the anti-reselling protection. It cannot be forwarded to another phone.
- **Unlock** releases a guest's phone lock (for example when they lose their phone). Use it sparingly; it is recorded.
- **View Card** shows the invitation exactly as the guest will see it.

---

10. Turnstile Scanner (`/scan`) — for gate marshals

Open on a phone. It works at the gate even with poor signal.

Before you start: set the **Day** (Day 1 Fri 18 Dec / Day 2 Sat 19 Dec / Day 3 Sun 20 Dec) and the **Gate**:

- Gate 1 — Royal & VIP Boulevard
- Gate 2 — General Turnstiles

- Gate 3 — Media & Hospitality East

Then: ask the guest to hold their QR access card inside the reticle. The scanner verifies the cryptographic seal (**HMAC-SHA256 Verified**) and shows one of four big coloured banners:

The screen says	What it means	What to do
DAY 1/2/3 ADMISSION GRANTED (green)	Valid pass, correct day	Let them through
ALREADY ADMITTED (DAY n) (amber)	Valid pass, but already used on this day	Politely turn them away — one pass per day
PAYMENT UNVERIFIED — ADMISSION DENIED (amber, heavy border)	The pass exists but the money has not been verified	**Do not admit.** Send them to the Secretariat desk
ACCESS DENIED (red)	Invalid, forged, revoked or wrong day	Do not admit. Ask them to visit the Secretariat desk

Underneath the banner the scanner shows the **Attendee**, **Tier**, **Affiliation**, the **Checkpoint** (which gate you are at) and a 3-day attendance tracker showing which days that guest has already been admitted.

The live counters at the top show **Total Scans · Admitted · Day Duplicate · Rejected**. **Return to Camera Scanner** brings you back to the camera. `/scan/history` keeps the full log.

---

11. Change Password (`/abawole/change-password`)

Every staff member should change their password at least once, and immediately if they think it is known to anyone else. The screen also lists the Secretariat's security recommendations.

---

12. The daily rhythm

Before Day 1

- Export the **Master Accreditation Roster** and print a gate copy.
- Confirm every gate marshal has signed in to the Scanner on their own phone.
- Check the Participants list: anyone marked *Pending Review* is resolved now.

Each morning

- Open the Command Centre — check registration and issued-pass counts against expectations.
- Clear the Verification Queue of anything that can be decided.

At the gate

- Set the day and gate correctly **before** the first scan.
- Watch for *Day Duplicate* and *Rejected*; keep a note of anything unusual for the Accounts.

End of each day

- Export that day's **Daily Turnstile Attendance Log**.
- The Accounts reconciles every bank transfer against the bank statement — unverified transfers stay *Pending* overnight, which is exactly right.

Before Day 3

- Every table booking must show **Amount Paid = Official Value** and status *Wire-confirmed or fulfilled* before that table's guests are admitted.
- Provisional slips are refused at the gate until the Accounts verifies.

---

13. Golden rules

1. **Never admit a guest holding a Provisional Claim Slip.** It means "not paid yet". Escort them to the Secretariat.
2. **Never verify a bank transfer without seeing the money** in the Club's account.
3. **Never share a login.** Every action is logged against a person.
4. **Never hand out a pass code to someone other than the named guest.** Passes are device-locked; forwarding is blocked by design.
5. **Use "Pending" honestly.** If it is not paid, it is not paid — that is what keeps the event's promises credible.

---

14. If something goes wrong

Symptom	What to do
"You do not have access to this area"	Your role does not cover that section. Ask a Super Admin.
A guest says their pass will not open	Check the Verification Queue — the pass may still be *Provisional* (unpaid) or bound to a different phone. Use **Unlock** if it is a lost phone.
The scanner will not work	Open the Scanner on a phone with data, or use the **Venue QR Poster** as a manual fallback and log the entry.
A duplicate booking was made	In Participants, use **Delete** on the duplicate, then re-issue.
A transfer was verified by mistake	Contact a Super Admin immediately — the pass becomes valid at the gate.
